

# Youth Program Open Recreation

- Remains closed; part day walk in program, not weekly child care
- Limited services:
  - Youth Program staff working in CDC/SAC; unable to support Open Recreation
- Not accepting annual memberships currently
- Consider re-opening after CDC/SAC new hires are on board and staff to child ratios are analyzed

## Mitigation

- Minimize staff & children – no teleworking personnel
- Minimize mixing - Staff & children remain in same rooms as much as possible
- Facemasks will be worn by all staff, custodians, visitors, parents if 6ft distance can't be maintained
- Will minimize number of children in large group gatherings such as, outdoor play, transitions to activity rooms within facility
- Will try to avoid combining YP/SAC
- Will ensure close coord between PH & CYP staff to ensure has info to prevent quarantined families from utilizing care
- Sanitization Process
  - Step 1: Prior to opening/throughout day disinfect counter tops, cubbies, doors/cabinet handles, panic hardware, toilets, faucets, sinks, playground equipment, and materials used by parents signing in/out
  - Step 2: Wear disposable clothes, clean surfaces w/soap/water.
  - Step 3: Spray surfaces w/bleach solution (1/3 cup bleach per gallon water) & let sit for 1 minute
  - Step 4: Consider modifying custodial contract; increase frequency of cleaning of common areas
